Support Plan for Operating Systems 2

Introduction

A supported operating system is one for which Cambium Assessment, Inc. (CAI) provides updates to the Secure Browser for that operating system. CAI actively tests the Secure Browser with supported operating systems to ensure compatibility and provides Secure Browser updates as needed when the supported operating systems are updated or as bugs in the Secure Browser are detected and fixed.

This document describes CAI’s plan for supporting operating systems during the upcoming test administration and following years. This plan helps districts and schools manage operating system deployments based on the support timelines.

Support Plan for Operating Systems

Table 1 lists the operating systems and the anticipated end-of-support dates. The shaded cells in Table 1 indicate the following:

- **Yellow shading**—CAI ends support for operating systems after the 2022-2023 school year.
- **Gray shading**—CAI ends support for operating systems after the 2023–2024 school year.
